

The Sustainables

Core Product Owner

The Sustainables make sustainability easy

Job description

As a product owner at The Sustainables, you collaborate with our customers, energy experts, great engineers, (data)scientists and other stakeholders shaping the best in class products and customer journeys for the advice and sales process of sustainable energy measures.

You are the frontrunner of the team in advising our (internal)customers and creating our core applications and shaping the roadmap of our core products.

You are an inspiration for your colleagues, help shape our internal processes and guide your colleagues in performing at their best.

Essential skills and experience

- Minimum of 5 years in a comparable role in a product company
- Experience with modern development processes (Scrum, Kanban) and practices (DevOps)
- Strong analytical background
- Natural leadership (you are not a manager)
- Inspirational for the people around you
- Experience in consulting clients on projects with a major impact
- Easy communication with all types of stakeholders
- Fluent in English and Dutch
- Affinity with sustainability

Pluses

- University degree in Engineering, Economics, Mathematics, Physics or a comparable degree
- Commercial experience
- Affinity with mathematical models

About The Sustainable

We are the leading IT company creating fully digitised customer journeys for advising and selling sustainable energy products to residential customers.

We offer our high-tech scalable solutions to a wide range of partners, from energy providers to banks and manufacturers of sustainable energy measures. With our licensed applications we already reach about half of all Dutch home-owners, helping them to make the transition towards energy sustainable home and efficient buildings.

Team

The company is organised in teams with far-reaching responsibilities facilitated by the small staff team. You build it, you ship it, you maintain it is our credo.

In a recent team survey, the top 2 scoring reasons to work at The Sustainable were our sustainable mission and the people in the company.

The team is a mix of people from diverse nationalities and is distributed over offices in the Netherlands, the Philippines, and Spain.

Company benefits

- Awesome colleagues and great development culture
- An opportunity to work on making the world more sustainable
- Top-notch technologies
- Spacious office close to a metro stop + a lot of parking space
- Conferences/training budget
- Friday kickboxing
- Healthy team lunch every day (also we all cook our own meals every Friday, including our CEO)
- Colleagues always in for (water)sports
- Regular team events (skiing trip, LAN parties, innovation sessions ..)

Our tech stack

Cloud-based solutions hosted in Azure, developed using the latest Microsoft (.NET Core) and other open source technologies (Vue).

Hiring procedure

To find the right fit between candidates and our company, when successful, the following steps lead to a match:

- **Remote:** CV & Cover letter assessment
- **Remote:** short call for a basic introduction
- **Remote:** ~1hr assignment
- **Remote:** longer call for getting to know each other better & answer any questions
- **Amsterdam office:** presentation of the assignment to a small part of the team + talk about practical things
- **Amsterdam office:** introduction with a bigger part of the team
- Match

We try to answer you as soon as possible, at least within 5 business days.

How to apply

To apply, please send your motivation and resume to simon@thesustainables.nl.

Agencies should not respond to this vacancy. Really.
